

```
fs.readFile("Input.txt", (err, dataFromFile) => {
  if (err) {
    console.log(err);
  } else {
    console.log(dataFromFile);
  }
});
```

**Chat App**

Not like request/response

Anyone can initiate the conversation

Peers can send multiple msgs between them (for 1 msg received multiple msgs can be sent)

Peers can read and write at the same time
