

Hands-On

- 1. Implement logout functionality
- 2. Implement authentication using Context
- 3. Sign Up | Log In
- 4. Display the message "Hello {username} !" on all components !

GraphQL

- 1. Strongly Typed Query language (API)
- 2. No overfetching / underfetching
- 3. Ask exactly what is required (selective data)
- 4. Serve as an interface/unified way between data provider of different data sources
